

Directions

Fold a strip of paper up accordion style and then draw a shape onto the top of the paper 'stack'. The shape must go all the way to each side of the paper and it must join on the sides. Cut the shape out through all the layers, making sure that the sides are not cut out. Open it up and you should have a chain of shapes. If you do not, try again and this time make sure that the sides are not cut out. Decorate your garland as you wish.
